## EDUCATION

---

|                                               |          |
|-----------------------------------------------|----------|
| Chandigarh University – B.E. CSE (CGPA: 7.35) | May 2025 |
| Sri Chaitanya Academy – Intermediate (97.8%)  | 2021     |
| British English School – Secondary (92.4%)    | 2019     |

## EXPERIENCE

---

Neeve.ai – Graduate Engineer Trainee Oct 2025 – Present

- Contributing to backend development using **Java**, **Spring Boot**, and microservice-oriented design.
- Working with **DevOps tools**, Docker workflows, and Agile-based development cycles.
- Using **bug tracking systems** and internal wikis for documentation, issue tracking, and feature collaboration.

Outlier (Contract Basis, Remote) – AI Training Associate Feb 2025 – Apr 2025

- Reviewed AI-generated solutions using **development and testing tools**, ensuring correctness and scalability.
- Applied **Java-based backend validation**, analytical reasoning, and structured problem-solving.
- Worked with **bug tracking workflows** and documentation wikis in Agile-style task cycles.

## SKILLS

---

**Programming Languages:** Java, C++, SQL, HTML/CSS

**Backend & Microservices:** Spring Boot, REST APIs, Microservice Design, Spring Security, Hibernate ORM

**DevOps & Tools:** Docker, AWS/GCP, Git/GitHub, CI/CD Basics, Maven, Postman, Apache Tomcat

**Development Practices:** Agile Methodology, Testing Tools, Bug Tracking Systems, Wiki Documentation, Code Optimization, Scalability & Automation

**Core Concepts:** OOPS, Core Java, Java 8 Features, JDBC, Servlets, JSP

**Interpersonal Skills:** Problem Solving, Analytical Reasoning, Team Collaboration, Leadership

## PROJECTS

---

Banking Web Application – Java, Spring Boot, MySQL, ReactJS, OAuth2 Apr 2025 – Jul 2025

- Built a full-stack banking system using **Java**, **Spring Boot**, and **Microservice-style components** ensuring maintainability and scalability.
- Implemented **secure authentication (OAuth2)**, modular account services, and tokenized transaction processing.
- Designed components using **software architecture principles** for efficient data flow and maintainable service layers.
- Integrated automated workflows for reward tracking, daily summaries, wallets, ledgers, and suggestion modules.
